An extraordinary statement is made in the St. Petershurg journals: In demolisaing a wall in the apartments of the Hered-hary Grand Duke, in what is called the "Great Palace," in that city, the skeleton of a woman was found still sovered with fregments of ciothing, which felt to dust on being exposed to the air. There is not the slightest tradition, they add, to show who the woman was, nor why she was closed up in the wall.

A New Steamson,-The Messes, Winans, of Baltimore, have a new steamship ready for faunching. She is of an entirely new model, and the builders expect her to make the passage across the Atlantic in six days. The length is almost 170 feet, resembling two cones, or sugar loaves, united, tajering to points, sharp almost as needles. The diameter at the trickest pert is proportionate to the conjoinclination. A large propelling wheel, with diagonal paddies, runs in the centre at right angles, and is driven by more following. driven by powerful engines.

Amusements for the "Dail Months,"

We learn with pleasure that a chess clubis being formed in this city, numbering spectable cliffens. This is a capital mothod by which to enliven the dull hours of innny others that might be decised. A young men's delating society would form 1 and meetings held one or two evenings in ! a week. These would not only improve our young men in public speaking, and fit then for elevated positions in society, but ) Hore their minds with information that would prove of the greatest value to them in after life. For something of a more cu-Inching nature, surprise parties and other re-unions might be given at intervals, which would serve the double purpose of passing i the time pleasurily and creating a good state of social feeling among the people, . We have thrown out these suggestions to be considered and acted upon as the people think proper. In an intelligent resources sufficient to enable the people to disperse the gloom incident to our comparative isolation during the winter months.

Ward's Soap and Candle Pactory. On the back streets of our city, nestled among its huildings, are numerous induswhere they are located, but which go to the city. Of this class is the one named in the caption of this article.

The establishment of W. G. & G. S. Ward is situated on Sherman Street, in the succession of the old established house of S. Ward. The business of the establishment is principally in the manufacture of the various grades of brown soap, though tallow candles are manufactured quite extensively during the winter months.

The indispensable article of hard soap, in the process of manufacturing, passes through a variety of changes, requiring alout four days to complete a " boiling,"-It is then, in its liquid state turned into moulds about 4 feet high by the same mimher of feet in length, with a width comparing with the length of a bar of soop, and allowed to cool, when the mould is removed, leaving a square block of soop of several hundred pounds, which is guaged off and through it, and the bors laid away to dry. The scap of the Messrs, Ward is A No. 1 in the market, and shipments of it are made to all parts of the country.

In the department of can'lles, judging from some specimens we saw of the stock on hand, they may defy competition in the excellence of their work, being as smooth and hard as spermacetti. The most favorable season for the manufacture of this article is during the fall and winter months, when the Messrs. Ward do quite an extensive business at it.

This establishment is making about two tens of suap per month, and several thousand pounds of candles annually.

STREET IMPROVEMENTS .- We notice that the repairs on Cannon Steet are completed The street has been graded, the gutters paved, curb stones set , and in many places The side-walk paved with brick.

Thames Street, south of the Gas Works has been widened some ten feet, and curb stones are being set on each side. This is a much needed improvement, and besides giving a uniformity in width through the entire length of the street, opens a more dire t avenue to the Clifs and the Spouring Ruck. Now that this has been done, the entire road by that route to the Cliffs should Lepat in order and earned round across Bailey's Beach to meet South Touro Street, This would improve the access to the Class and Spouting Rock, and afford, at the sam time, un eligant carrage drive.

Trial of Fire Engines.

The following communications were handed in to us Saturday. The report published by us on Wednesday was the one made by the judges on Tuesday night. On among its members some of our most re- Wednesday morning, having been told that it was erroncour, we suggested to the the approaching winter, and is only one of Thursday's paper, which they gave us to understand they would do. This is all we know about the matter, had we given the another excellent source of directisement, report in the first place as our own, we and one which all night participate in should have felt some responsibility about with mental posit. It should be open to it, as it is, we feel that wherever the blance does lay, time of it can be imputed to us,

Mr. Lietron :-- I have looked over the columns of the Mean every morning since the Firemen's Muster, expecting to see the official report of the Judges, signed by them, together with their opinion of it, but ) up to this time no such report. has appear-

In the result as contained in your paper of Wednesday morning last, Engines No.'s 6 and 4 are shown to have FILLED the tank in 3.15 and 1.18 respectively. As every one in town knows, this is not so, the tank being but half filled in the time given ; according to which it would appear to people population like ours, there are certainly as the other engines. Again, the published result gives No 2, 162ft 9 in, as the best horizontal play.

This tools considered to be grossly inconsistant. Nu's 1 and 5 doing much better than No. 2, which by remeasurement, by the same parties who made the first measuretrial establishments, the locality of which is ment, is only shown to have been 149. hardly known outside the neighborhood I don't wish to claim for No's 1 and 5 any great playing, but I do say that the Judges swell the aggregate of productiveness of ought to come out and give all the facts as they are.

. HERCULES,

NEWPORT, Oct. 2d, 1858. Mn. Epiron-Dear Sir :- In order that

the public should not be misled by a statement of the Mercury of this day, in regard to the trial of the several engines on the 28th ult, we find it due to Mr. James Smith, builder of the No. 4, to state that this machine filled the tank one half full in I minute 13 seconds, with only one butt, while the No. 3, with two butts, filled it in the same time. Consequently the No. 4 come off even with No. 3 and ahead of all the other machines.

ONE OF THE FOURS.

To the Editor of the Daily New : ...... I should like to inquire of the Chie Engineer, through your colums, what is the capacity of each of the engines, that played into the tank at the trial of engines

"it is a perfect Restorative;" but read the circular and you cannot doubt; read also the following:—
If The Hark.—Prople have for centuries been afflicted with bald heads, and the only remedy, heretofore known, has been those alminished wigs. By a recent discovery of Professor Wood these articles are heing fast dispensed with, but a great many persons still patronize them, because they have been as often imposed upon by Halr Tunies of different kinds. To all such persons we carnestly make the request, that they will try onen sgain, for in Wood's Restorative there is no such thing as fail. We know of a lady who was bald, who used the article a short time, and her head is now covered completely with the timiest and must beautiful curls imaximable. We know of numerous cases where halr was rapidly falling out, which it restored in greater perfection than it ever had been before.

It is also without doubt one of the beat articles for keeping the hair in good condition making it soft and glossy, removing dandruff and has proved itself the greatest enemy to all the tills that hair is heir to.

It is the duty of every one to improve their presonal appearance, though come may differ in regard to the ways of doing it; but every one will admit that a beautiful head of hair, either in man or woman, is an object much the desired, and there are no means that should be left untried to obtain runch a consideration.—[Woman's Advocate, Philadelphia.
